

Revision of solvent prices for electronic materials

Daicel Corporation (President: Yoshimi Ogawa, Head Office: Kita-ku, Osaka) will revise the prices of solvents for electronic materials as explained below.

Since 2020, there has been further increase in market prices due to strong demand and limited availability of raw materials. Additionally, costs of utilities and domestic and international transportation have been significantly rising. Daicel has been making a continuous effort to decrease these costs, but increases in raw fuel and logistics costs have exceeded the limits of our cost-containment efforts. Daicel will thus shift towards increasing costs and correction of profit margins.

- Products Concerned

- 1-Methoxy-2-propanol

- 3-Methoxy butyl acetate

- 1-Methoxy-2-propyl acetate

- Revised Prices

- We will notice customers respectively.

- Date of Price Revision

- Shipment after May 24th, 2021
