

## Price Increase effective May 1, 2022

Daicel Corporation (President and CEO: Yoshimi Ogawa) will implement price increases on the following products effective May 1, 2022 in response to continued global escalation of energy and logistics costs.

### 1. Products

- Acetate Tow
- Cellulose Acetate
- Epoxy Products
- Caprolactone and its derivatives
- Ketene and its derivatives
- Amines
- Acetic Acid, Acetic Anhydride and Acetic Acid Esters
- Acetate Solvents and Alcohols (MMPG, MMPGAC, MB, MBA, etc.)
- Glycol Ethers
- Plastic Processing Products including Functional Film

2. Price increase range : 10% or more on all the products listed above

### 3. Effective Date

May 1, 2022 and onwards on shipment basis

### 4. Reason for price revision

At present, overall costs, including energy costs such as crude oil, coal, and asphalt, as well as raw materials and logistics costs associated with the production of the products subject to the price revisions, have soared to the levels far exceeding our expectations. Under these circumstances, we have been making company-wide efforts to reduce costs. However, we have determined that it would be difficult for us to cope with these cost increases by our own efforts, and have decided to revise the prices of the relevant products.
