

## Chemical Product Safety

### Other Activities in Chemical Product Safety

- **Appropriate Control of PCBs**

In compliance with the Waste Management and Public Cleansing Act and the Act on Special Measures Concerning Promotion of Proper Treatment of PCB Wastes, Daicel conforms to appropriate practices for the storage and management of transformers, capacitors and other machinery containing polychlorinated biphenyls (PCBs). Daicel systematically stores and handles PCB waste in an appropriate manner.

- **Compliance with European REACH Regulation**

The Company is working to be in compliance with the REACH regulation that covers chemical products exported to Europe.

Before the 2013 deadline, the Company completed on schedule the registration of all chemical products with an annual export tonnage of 100 to 1000 tons.

Looking ahead, the Company conducts chemical safety assessments according to the plan, and completes the registration of all chemical products with an annual export tonnage of 1 to 100 tons before 2018 deadline.
