

## Environment Preservation

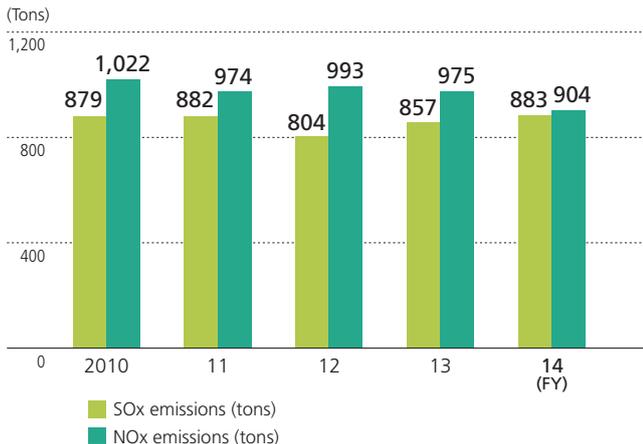

### Environmental Management to Prevent Atmosphere and Water Pollution

The Daicel Group strictly adheres to regulatory requirements as well as requirements determined through negotiations with local governments and municipalities by setting voluntary management targets that are below these requirements and then working to preserve the environment based on these targets.

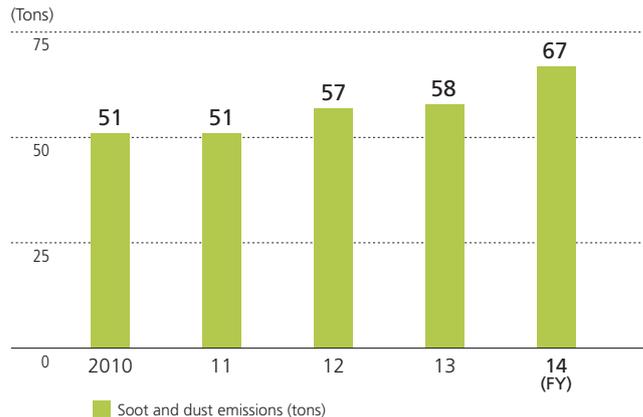

In fiscal 2014, emissions changed compared with fiscal 2013 but remained far below our voluntary management targets.

To comply with the full enactment of revisions to the Water Pollution Prevention Act in June 2015, the Daicel Group adopted new structure standards for special facilities that make use of harmful substances, and periodically inspects the facilities to ensure they prevent the leakage of harmful substances into the ground.

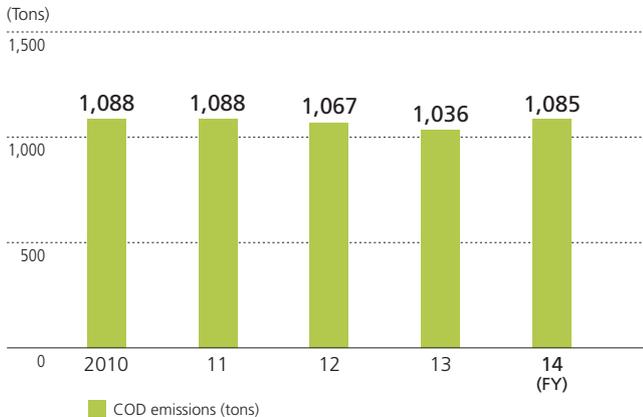

#### ▶ Daicel's SOx/NOx Emissions

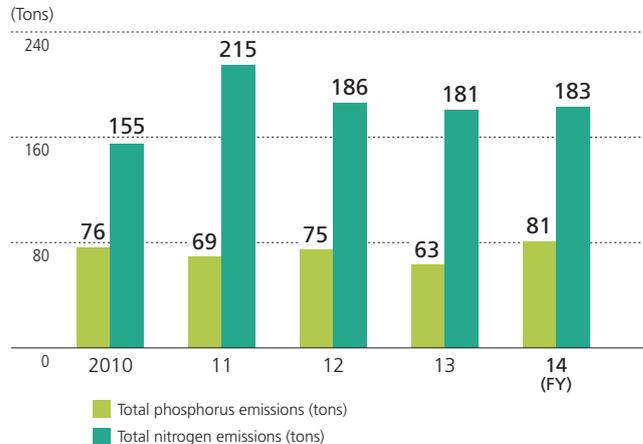

#### ▶ Daicel's Soot and Dust Emissions

#### ▶ Daicel's COD Emissions

#### ▶ Daicel's Total Phosphorus/Nitrogen Emissions

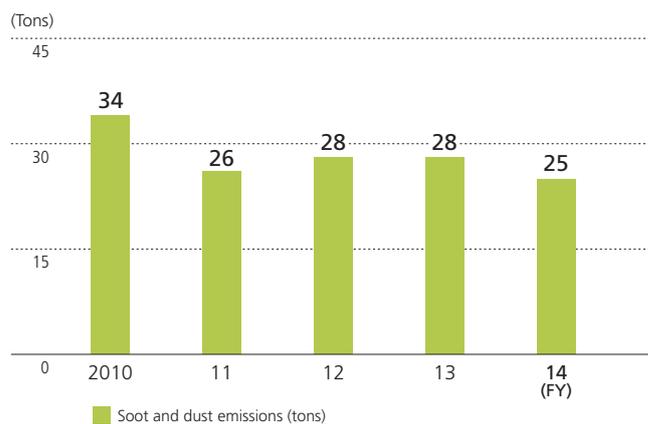

The fiscal year atmosphere and public water data for Other Group Companies is set out below.

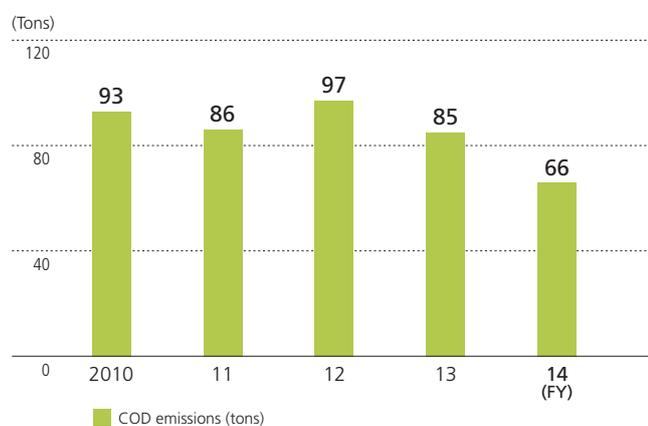

**SOx/NOx Emissions at Other Group Companies**

**Soot and Dust Emissions at Other Group Companies**

**COD Emissions at Other Group Companies**

**Total Phosphorus/Nitrogen Emissions at Other Group Companies**
